TOKENOMICS

Name: VITRAVERSE

Acronym: VTRV

Contract: 0x54bCAeEaBD26fE69f11471eB68298b2777C104b0

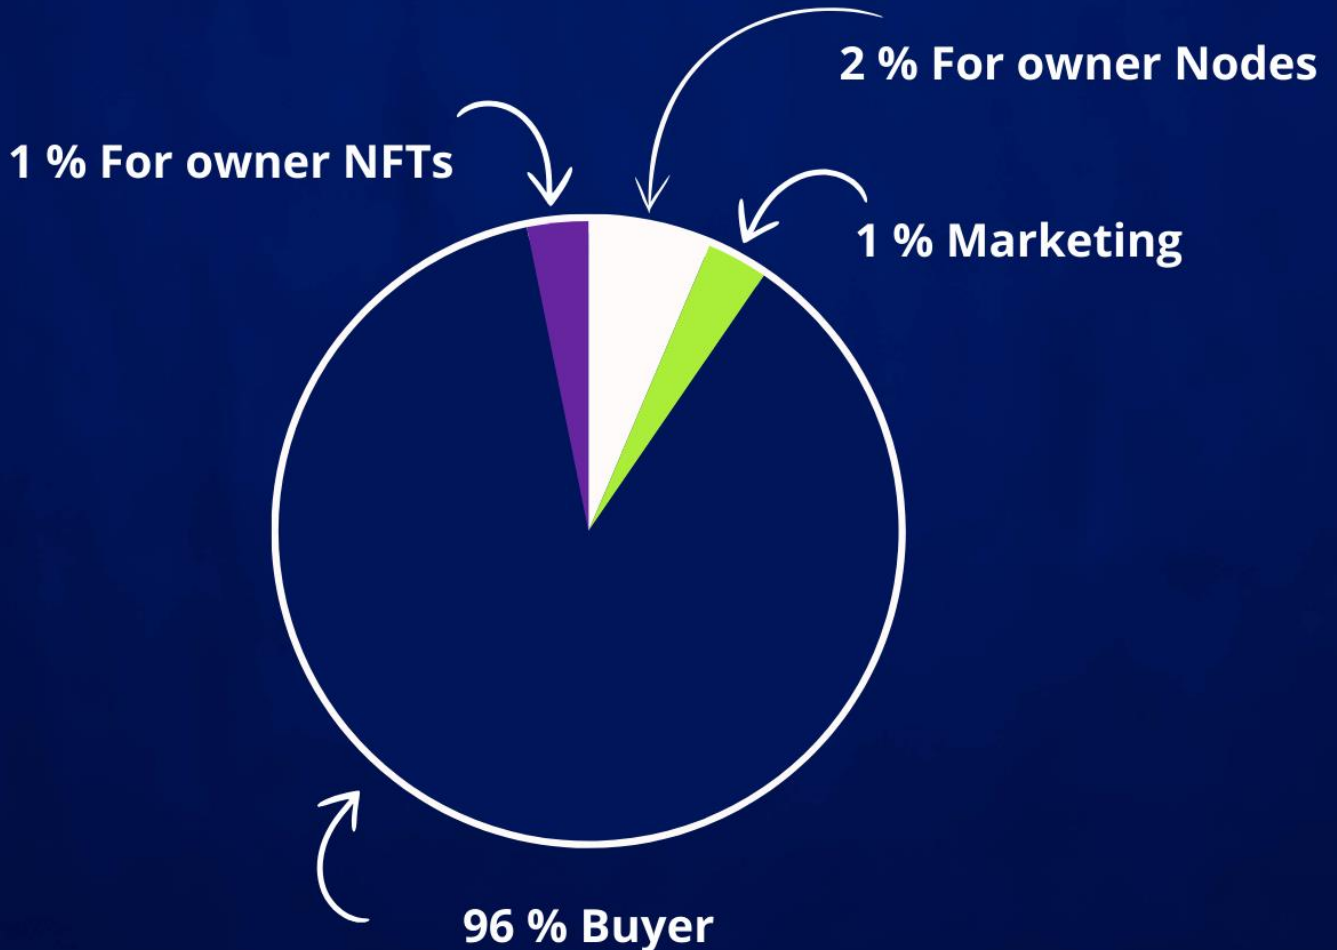

Category: Token

Network: BNB Chain

Total Supply: 10 million

Purchase rate: 4%

Selling Fee: 4%

INTRODUCTION

Welcome to VITRAVERSE, a BEP20 token belonging to the VITRA universe that was designed to be the backbone of our metaverse, providing a dynamic and rich experience for all its users. VITRAVERSE has a total supply of 10 million tokens, operates on the robust and efficient BNB Chain network, ensuring speed, security and transparency in all transactions.

VITRAVERSE is more than just a token; he is an enabler of a new digital economy within the VITRA metaverse. The coin has a 1:1 peg with the altcoin VITRA that operates on its own network, making it accessible and stable for all participants in the ecosystem. With VITRAVERSE, users will be able to buy, sell, and exchange digital assets, participate in games, events, and more, all within an immersive and interconnected virtual environment.

This document details the vision, technology, and potential of the VITRAVERSE, highlighting the unique advantages it brings to the crypto market and how it is contributing to the transformation of Web3 and the metaverse.

Get ready to explore the future of virtual transactions and discover how VITRAVERSE is shaping a new digital horizon.

VITRA GAME

V-Game is the gaming platform of the VITRA STUDIOS blockchain, designed to revolutionize the experience of gamers around the world. By integrating games into the blockchain, we offer a new dimension of security, transparency, and innovation to the digital entertainment market. With a robust infrastructure, the platform will allow games of various types, such as P2P (peer-to-peer), PVP (player versus player), and betting, to work efficiently and reliably, providing users with an unparalleled gaming experience.

The main advantage of using blockchain in V-GAME is the elimination of intermediaries, ensuring that all transactions and asset exchanges are direct between players. This not only increases security but also ensures the authenticity and ownership of in-game items. Additionally, the blockchain offers a transparent rewards system where players can earn and exchange assets of real value, encouraging ongoing and meaningful engagement, thereby creating a strong community around a robust ecosystem.

The gamer universe is one of the strongest and most dynamic sectors of the global economy, attracting millions of players and has moved trillions of dollars every year. Leveraging the strength of this aspect of entertainment, we've developed a fast and secure platform that meets the needs of modern gamers. With games ranging from intense battles to exciting challenges and strategic betting, V-GAME is positioned to be a leader in the blockchain gaming market, offering an engaging and secure experience for everyone.

In an increasingly digital world, where speed, interactivity and security are crucial, V-GAME stands out as a cutting-edge solution. By tapping into the vast and growing gaming market, we will redefine the standards of quality and innovation, ensuring that players have access to a fair, safe, and exciting gaming environment. Get ready to enter the new era of gaming with V-GAME, where every playthrough is an opportunity for success.

Get To Know Our Games!

V-RACE

Our exciting racing game offers a competitive and innovative PVP (player versus player) experience. In V-Race, players face off in thrilling races where the winner takes the lion's share. This dynamic not only guarantees intense and adrenaline-pumping matches, but also directly rewards the skill and strategy of the competitors.

By using blockchain technology, we ensure that all transactions are secure, transparent, and fast. Part of the amount is used to fund essential activities such as; continuous marketing and development of the game, ensuring that the players' experience is always evolving. In addition, a portion of the transaction fees is allocated to reward Node and NFT holders, providing a source of passive income for the project's supporters.

Get ready to enter a racing universe where every victory count and every player has the chance to be a part of something bigger. Whether you're a racer looking for glory or an enthusiast supporting the ecosystem, V-Race is more than a game, it's a lifestyle with a community driven by a passion for speed and innovation.

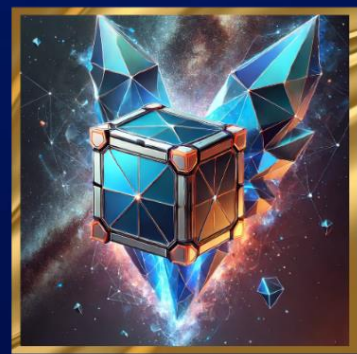

A fascinating and engaging metaverse themed around space exploration and planet defense, where users can earn crypto while venturing into the cosmos. In this digital universe, players have the opportunity to become space explorers, defenders of their planets, and digital asset traders, all within an immersive and interactive environment.

The benefits of our metaverse are immense and impactful, through the use of blockchain technology, players can secure ownership of their digital assets, making their achievements and collections unique and secure. The possibility of earning cryptocurrencies while playing the game not only increases the motivation of players, but also offers a new form of digital income. Additionally, the theme of space exploration and planet defense provides an educational and exciting experience where players can learn about the universe as they play.

The potential of the metaverse is vast, offering a virtual space where imagination is the limit. People are increasingly using metaverses like Solarium to socialize, play games, and even work, creating a new paradigm of digital interaction. These virtual environments allow for the creation of global communities, where individuals from different parts of the world can meet, collaborate, and compete in real-time.

Solarium is not just a game, but a gateway to the future of digital interactions. With the ability to explore new worlds, defend planets against threats, and earn real crypto rewards, Solarium offers an unparalleled experience that combines fun, learning, and financial gain all in one place. Join the digital space revolution and discover the universe without leaving home with the Solarium.

VITRAVERSE TOKEN

We are always looking for innovative and effective strategies that enable our users and fans to enjoy a healthy and safe Web3 environment. In addition, we are concerned with inserting new users from the traditional world into Web3, for this, we need a strong arm in a blockchain like BNB Chain that offers us advantages such as:

- Fast and efficient speed;
- Low transaction cost;
- EVM compatible;
- Creation of Smart contracts;
- Security and transparency.

SMART CONTRACTS

A fundamental component of Web3, it is a self-executing program that performs specific actions, as long as the conditions are met, they are the ones that have made it possible to create decentralized applications that operate without the need for intermediaries.

Among the most relevant factors of Smart contracts for the creation of Web3 we can mention:

- Automation of agreements: used in legal and commercial processes, reduces the need for intermediaries, which increases the efficiency and speed of the process.
 - Safety: When recorded on the blockchain, they become immutable and secure, ensuring that the agreed conditions are met and without changes.
 - Dapps: forms the basis of decentralized finance platforms, games, and NFTs, driving the development of Web3
 - Decentralization: most prominent point, it gives users the management of their respective assets.
- 

GOVERNANCE VITRAVERSE

The proposed ecosystem belonging to the VITRA universe, has 1200 Nodes and 2000 NFTs, we will together with the community build and make history where each user, whenever necessary, will be heard through their respective position.

Participation with Tokens

Voting: Token holders will be able to vote on important proposals that affect the development and direction of the ecosystem and metaverse.

Proposals: Any member with tokens can suggest improvements or changes to the platform, always aiming at the common good.

Incentives: proactive users, who provide valuable contributions with ideas or, defending the community and the project, can be rewarded by the project with prizes that will involve tokens, altcoins, NFTs, event tickets, gifts and the like.

Participation with NFTs

Digital Property: NFT is a unique digital property in the metaverse, whether it is virtual land, items, or art. Holders in NFTs and Nodes can get additional privileges in governance such as extra voting, exclusive proposals, and early access to ecosystem launches.

Identity and reputation: Members with NFTs can leverage their holdings to advocate for the development of the project and have an improved governance experience based on their actions and reputation in the community.

Exclusivity: only holders of Nodes and NFTs will be able to participate in exclusive meetings and brainstorming sessions with developers and programming staff, as well as an open and healthy chat between all members of the group.

Following the same dynamics of token holders, they will also be able to participate in the construction of the VITRA universe with voting, proposals and incentives.

ADVANTAGES OF DECENTRALIZED GOVERNANCE

Democracy: All members have an active voice and can influence the future of the metaverse, thus creating an inclusive and democratic environment.

Transparency: The final decisions are transparent, with all proposals and votes well recorded in blockchain, we guarantee the legitimacy of the result, free from fraud and manipulation.

Motivation: Active participation seeks to strengthen the sense of community and engages new members, encouraging the construction and growth of a metaverse and healthy community.

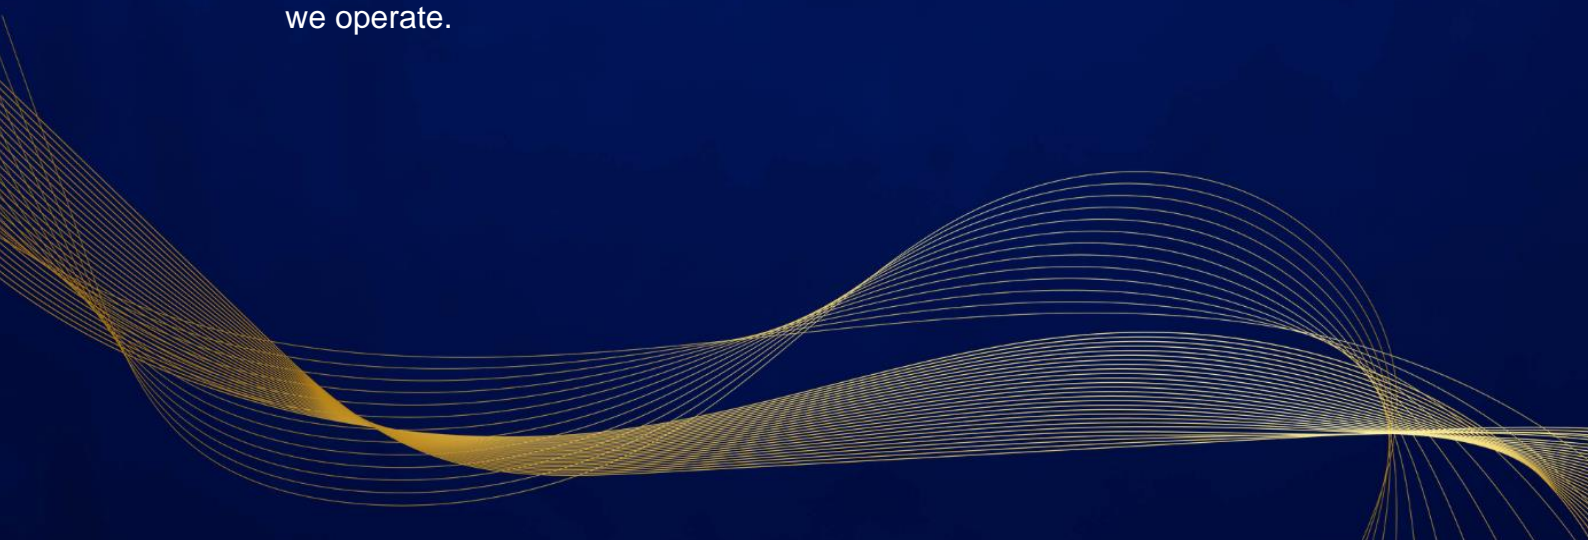

LEGALITY AND COMPLIANCE

The VITRAVERSE token is designed to operate within the legal and regulatory boundaries of each country where it is used. Here are some key points about how it performs in terms of legality and compliance:

Regulatory Compliance

- **Local Regulations:** In each country, VITRAVERSE must comply with local laws and regulations related to cryptocurrencies and digital assets.
- **Transparency and Reporting:** Blockchain projects are transparent because each transaction is on the ledger, thus being immutable and auditable, ensuring that all transactions are legal.
- **Asset Classification:** Depending on the country, VITRAVERSE can be classified as a digital asset, a security, or another type of asset, which determines the specific regulations it must follow.

Legality and Safety

- **Smart Contracts:** The smart contracts that govern the VITRAVERSE are designed to be secure and immutable, ensuring that all transactions are executed as agreed upon and recorded on the blockchain.
 - **Protection of Users:** Robust security measures are implemented to protect users and their assets, including the use of advanced encryption technologies and regular audits.
 - **Collaboration:** We work closely with audits to always keep the platform secure and we have a complete legal department, responsible for ensuring that the legality and compliance of the project with the current regulations of each country where we operate.
- 

SAFETY

As for the VITRAVERSE token, it uses auditing services from renowned companies in the industry to ensure the security and transparency of the platform, metaverse, games, NFTs, and blockchain.

The audit involves a detailed review of the platform's code, security practices, and operations to identify and remediate potential vulnerabilities. This helps to keep the platform safe from fraud and cyberattacks, ensuring that users can trust the services offered.

Each and every product developed within the VITRA universe undergoes an audit report and legal analysis, in order to always maintain the integrity and safety of products and users.

NEXT STEPS

The future VITRAVERSE is promising, especially because it has a strong, healthy, and engaged community, which drives its growth and adoption.

1. VITRAVERSE Expansion

With an active community, the VITRA metaverse can constantly expand its functionalities and experiences offered to users. New worlds, games, and events can be created, providing a dynamic and compelling environment that encourages continued participation.

2. Development of Decentralized Applications (DApps)

The community can contribute to the development of DApps that utilize the VITRAVERSE token, creating a rich and diverse ecosystem. These applications can range from NFT marketplaces to metaverse education and training platforms.

3. Integration with Other Networks and Platforms

Over time, VITRAVERSE may seek partnerships and integrations with other blockchain networks and platforms, broadening its reach and utility. This could include collaborations with other metaverse projects, crypto exchanges, and decentralized finance (DeFi) platforms.

4. Active Participation in Governance

Decentralized governance allows VITRAVERSE token holders to have a say in important project decisions. With an engaged community, decisions made are made in a democratic manner, ensuring that the development of the metaverse always meets the needs and desires of its users.

5. Rewards and Incentives

Rewards and incentive programs can be implemented to encourage active community participation. This could include rewards for contributing ideas, voting on proposals, or helping to promote the project across different channels.

6. Education and Awareness

A strong community can help educate new users about the benefits and uses of the VITRAVERSE token, increasing awareness and adoption of the project. Workshops, webinars, and tutorials can be organized to help members better understand the workings and opportunities of the VITRA metaverse.

7. Sustainability and Innovation

Continued community engagement can foster innovation and ensure the long-term sustainability of the project. The community can suggest improvements, new features, and strategies to ensure that VITRAVERSE remains relevant and competitive in the cryptocurrency market.

VITRAVERSE FOUNDERS

With great pride we present the visionaries behind VITRAVERSE, Luís de Almeida and Davi de Oliveira. Both successful entrepreneurs and experienced jurists, Luís and Davi are the driving force that propels VITRA to new horizons. Together, they have worked tirelessly to bring together the best professionals in the areas of Programming, Administration, Finance, Legal and Marketing.

Their mission is clear: to transform the world of NFT Games, develop external games for Desktop and Mobile, and create amazing Video, Music and Digital Book applications. Luís and Davi's passion for innovation and excellence is evident in every VITRA project. They are committed to not only keeping up with trends, but defining them, creating solutions that truly make a difference.

With a dedicated and qualified team by their side, Luís and Davi are ready to take VITRA to even higher heights. Join us on this exciting journey, where every step is taken with integrity, innovation, and a deep commitment to excellence. Welcome to the future with VITRA, where dreams are turned into reality!
